

# Dishwashers

AEG dishwashers deliver state-of-the-art performance without compromise. Superior results are achieved with each wash, regardless of the load. These European, ENERGY STAR® rated appliances are designed to provide the best possible results in terms of cleanliness, shine, dryness, time, noise, water and energy consumption.

# Design

## Style meets quality.

### Whisper-quiet operation.

AEG dishwashers are among the quietest in the world with noise levels as low as 45dBa.

### Green Approach

AEG has adopted a 360-degree approach to sustainable design, making it a consideration throughout the supply chain, from the procurement of raw materials, construction of products, delivery methods, and ultimately, the disposal of the appliances once they have reached the end of their lifespan.

Washing your dishes in an AEG dishwasher actually consumes less water, energy and detergent than washing by hand. AEG dishwashers are ENERGY STAR® rated, and all AEG appliances comply with RoHS (Reduction of the use of certain hazardous substances), a European Directive that calls for the reduction or elimination of potentially harmful substances such as lead, cadmium, mercury and chromium in the manufacture of appliances and electronics.

### Stylish design.

AEG dishwashers combine stylish design with European engineering and robust, high-quality manufacturing. Our 60cm (24") tall tub dishwashers are available in fully integrated or semi-integrated finishes for a custom look, or in stainless steel. Slimline dishwashers, only 18" (45cm) wide, provide a compact option for smaller spaces, and accommodate eight place settings.

### Four styles available:

- **Fully-integrated dishwasher**

The dishwasher is hidden behind a full height furniture door and operated by controls on the top edge of the dishwasher door.

- **Semi-integrated dishwasher**

The dishwasher has a visible control panel, which matches in height to the control panel of an oven and the drawer line furniture. A short furniture door is fixed below the control panel.

- **Slim-line dishwasher**

A 45cm fully integrated dishwasher for smaller spaces.

- **Extra high dishwasher**

Some dishwashers within the range provide extra space inside the cavity for more flexible loading of larger pots and pans.

# Performance

## Exceptional performance and results.

### Easy installation.

AEG dishwashers have been designed with the user in mind. The installation process has been simplified to make setting up your new appliance a quick and hassle-free process, with cold or hot water hook up.

### Energy efficient.

AEG is committed to minimizing the amount of electricity, water and detergent used by household appliances. Three factors are measured: energy rating (running costs), wash performance (cleaning results) and drying performance (quickest drying results). Some models now consume only 12 litres of water and all of our dishwashers have eco-friendly ENERGY STAR® ratings, achieving maximum energy efficiency. The economy 50°C wash program is more energy efficient and environmentally friendly and offers an extended wash program at lower temperatures. This reduced energy consumption not only helps to care for the environment but saves money for users as well.

### Perfect results.

AEG dishwashers are designed to give excellent performance, no matter what the load.

### Advanced Fuzzy Logic.

Advanced Fuzzy Logic delivers perfect washing performance whilst keeping water, electricity and detergent consumption to a minimum. To ensure all food debris is removed the wash phase thoroughly cleans, and the rinse phase effectively rinses off any residue, resulting in dishes that are shiny and streak-free.

### Automatic sensors.

Automatic water sensors measure the turbidity of the water in the pre-wash cycle and assess how much more water is needed to clean the dishes perfectly.

### Quick wash.

Delivers top-notch wash performance in as little as 37 minutes, giving great results in no time.

### Auto load options.

A choice of two automatic wash options, which calculate the optimum program for either a china and crystal load (wash at 55°C/131°F, final rinse at 69°C/156.2°F) or a heavy load (wash at 65°C/149°F, final rinse at 70°C/158°F). Lightly soiled dishes will use less water and time than a heavier soiled load. Perfect results every time.

### Detergent.

AEG dishwashers are designed to work effectively using any of the detergent options currently available: powdered; liquid; or the now-popular 3-in-1 multi-tabs. Whatever option you choose, AEG dishwashers maximize the cleaning power, and rinse clean for sparkling dishes and glassware.

# Features

## Enhanced flexibility and convenience.

### Convenient loading.

Clever dishwasher loading design means you can get the most out of each wash load. The flexible upper basket is height-adjustable to three levels, allowing large plates and dishes to be fitted in with ease, even when fully loaded. This feature is complemented by foldable bottom plate supports, which fold down to accommodate larger pots, pans or casserole dishes. Other features, such as the long stemmed wine glass holders, give total flexibility and care for the most delicate items.

### Half Load Program Options

Save energy and water. If you only have a half load, choose to wash either the top rack or the bottom rack. Half load option available on all programs except soak.

### Cutlery basket.

The modular cutlery basket allows cleaned sets of cutlery to be removed from the dishwasher easily and hygienically. The half section of the cutlery basket can be used when using the half load program.

### Spray arms.

The 18" model features a unique shuttle system that allows the spray arm to travel back and forth across the entire length of the dishwasher, providing the best possible cleaning results. (This is necessary as the dishwasher is narrow & long; 18"x 24".)

# Programs

## Gentle on your glasses.

### Protecting your glasses.

AEG has developed a glass program you can really trust. Glass-care 45°C is powerful enough to thoroughly clean glasses, yet gentle enough to care for delicate glassware. In addition to having a program to care for your glasses, AEG dishwashers also have adjustable glass supports to provide extra stability.

### Rinse aid indicator.

The rinse aid indicator tells you when more rinse aid is required preventing cloudy, streaky glasses.

### Intensive-care 70°C.

For an ultra clean wash the new advanced intensive-care 70°C wash is an intensive wash cycle where the final hot rinse is extended by 11 minutes, thereby producing a more hygienic result.

### Program Delay.

Use program delay to delay the start of the program up to 9 hours, allowing you to run the dishwasher during off peak times. Available for all programs except soak.

### Reassurance on performance.

With just a glance at the control display AEG models are able to provide immediate feedback so you get the best wash result every time. The LED display indicates the stage of the program for perfect time management.

### Rinse hold.

A cold rinse removes food deposits and holds the wash until you have a full load – a really efficient way to use the dishwasher.

### Salt refill indicator.

Adding dishwasher salt into the salt container helps soften the water, which then provides a better wash.

### Aqua control.

Aqua control provides complete peace of mind. If any leaks are detected, sensors prevent water entering the dishwasher and prevents flooding.

F65478 VI-S

18"/45cm fully integrated dishwasher.

**5 programs**

- Rinse
- Automatic delicate 50-60°C/122-149°F
- Normal wash 50°C/122°F
- Crystal wash 45°C/113°F
- Sanitization extreme wash (Washes at 66°C/150°F, rinses dishes at 70°C/167°F)

**Dimensions**

- 44.7-44.9 cm wide x 52cm deep x 82-87cm high
